

Grounding and Mechanical Lug

Ordering #: EC-40B

- **Reliable Ground Path:** Provides a secure, low-resistance connection to ground for fault current dissipation
- **Corrosion-Resistant Materials:** Made from durable copper or tin-plated alloys for long-term outdoor performance
- **Utility-Grade Performance:** Ideal for grounding transformers, switchgear, and pole-mounted or pad-mounted equipment
- **Versatile Mounting:** Can be installed on enclosures, conduit, and structural frames
- **UL E109333 Certified:** Meets UL grounding and bonding equipment standards for safety and performance
- **CSA 70063223 Compliant:** Approved for use in Canadian utility and electrical systems
- **Wide Conductor Compatibility:** Accepts a broad range of wire sizes and solid or stranded conductors
- **Secure Bonding:** Ensures proper bonding of metal components to reduce shock risk and equipment interference
